Eindrücke von Authentizität und Wert.

Authentische Werte, natürlicher Reiz, mediterraner Touch: das sind Eindrücke, die Ulivo hervorruft. Ein hochwertiges Holz von ungewöhnlicher und verführerischer Farbe mit ausgeprägtem Kontrast der Knoten und Äderungen, das von der keramische Oberfläche äußerst naturgetreu reproduziert wird und die gleichzeitig hervorragende technische Eigenschaften gewährleistet. Das Mosaik Tatami wird zum kostbaren Einrichtungsfinish, um architektonische Räume zu gestalten.

Sensaciones de autenticidad y valor.

Valor auténtico, sugestión natural, perfume mediterráneo: son las emociones que evoca Ulivo, madera preciada de tonalidad insólita y seductora y de un marcado contraste de nudos y venas que la superficie cerámica reproduce con absoluta fidelidad, garantizando características técnicas excelentes. El mosaico Tatami se convierte en precioso acabado de decoración para revestir con estilo los volúmenes arquitectónicos.

Ощущение подлинной ценности.

Подлинная ценность, натуральное очарование, средиземноморский аромат – вот ощущения, которые вызывает Ulivo, фактура, преданно воспроизводящая изумительный цвет и ярко выраженный контраст узлов и прожилки оливкового дерева. Великолепная эстетика плиток дополняется превосходными техническими характеристиками. Мозаика Tatami становится ценным элементом финальной отделки, придающим архитектурным объемам особую стильность.

GREEN PROJECT

The LEED BD&C v 4 standard (LEED Building Design & Construction), effective since 31 October 2016, is a rating system dedicated to the development of “green” buildings. Developed by the US Green Building Council and internationally recognised, it outlines the necessary requirements to build eco-compatible projects, capable of functioning in a sustainable and autonomous way from an energy point of view, as well as having a low environmental impact throughout their entire life cycle. This system is based on the allocation of credits for each single requirement: the total amount of credits defines the certification level obtained. Ceramic tiles can also contribute to the achievement of LEED points. Ceramiche Atlas Concorde is a member of the US Green Building Council.

Lo standard LEED BD&C v 4 (LEED Building Design & Construction), entrato in vigore il 31 Ottobre 2016, è un sistema di rating per lo sviluppo di edifici “verdi”. Elaborato dall’US Green Building Council e riconosciuto a livello internazionale, indica i requisiti per costruire edifici eco-compatibili, capaci di funzionare in maniera sostenibile ed autosufficiente a livello energetico e di avere un basso impatto sull’ambiente durante tutto il loro ciclo di vita. Il sistema si basa sull’attribuzione di crediti per ciascuno dei requisiti: dalla somma dei crediti deriva il livello di certificazione ottenuto. Anche le piastrelle ceramiche possono contribuire al raggiungimento dei crediti LEED. Ceramiche Atlas Concorde è membro dell’US Green Building Council.

VOC CONTENT.

Low-emitting materials with zero emission of volatile organic compounds (VOC). It can contribute to the awarding of 1 LEED credit.

Materiali a bassa emissione con cessione nulla di sostanze organiche volatili (VOC: “volatile organic compounds”). Può contribuire al raggiungimento di 1 credito LEED.

PORCELAIN TILES COLLECTION

Outdoor products that mitigate the “heat island” phenomenon, thereby reducing effects on the microclimate, the human habitat and wildlife can contribute to earning a LEED credit.

HEAT ISLAND EFFECT. Possono contribuire al raggiungimento di un credito Leed i prodotti che, utilizzati in esterno, mitigano il fenomeno dell’ “isola di calore” riducendo gli effetti sul microclima, sull’habitat umano e sulla fauna selvatica.

BUILDING PRODUCT DISCLOSURE AND OPTIMIZATION. SOURCING OF RAW MATERIALS (MR) “RECYCLED CONTENT”.

For several porcelain stoneware items and all Light-body wall tiles, Atlas Concorde has a certificate issued by a third party that certifies the percentage of recycled “pre-consumer” material and that can therefore help earn a LEED credit.

Per diversi articoli in grès porcellanato e tutti i rivestimenti in pasta bianca, Atlas Concorde dispone di una certificazione rilasciata da ente terzo che attesta la percentuale di materiale riciclato “pre-consumer” che può contribuire al raggiungimento di un credito LEED.
